**Riverdi notification:**

Riverdi Sp. z o. o. announces the EOL and last time orders for all 4.3" TFT modules with current TFT glass. This situation is caused by an unexpected change of TFT glass from current one to new one as described below.

**Ordering information:**

Riverdi Sp. z o. o. accepts last time orders for modules with the old TFT glass till the 30<sup>th</sup> of June 2017.

Riverdi Sp. z o. o. accepts initial orders for samples of modules with the new TFT glass till the 8<sup>th</sup> of June 2017. Expected shipment date of samples will be on the 27<sup>th</sup> of July 2017.

Modules with the new TFT glass will replace the old modules in accordance of FIFO policy.

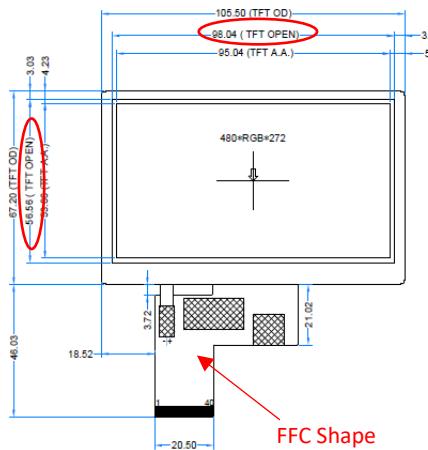

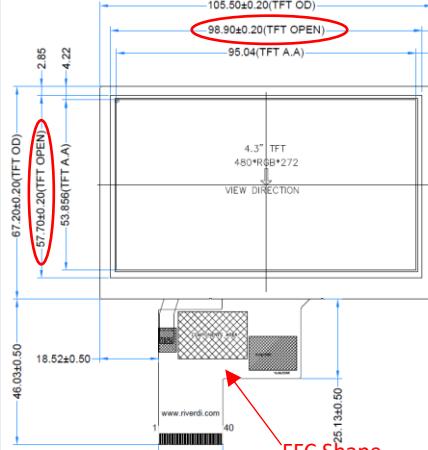

**TFT module replacement solution:**

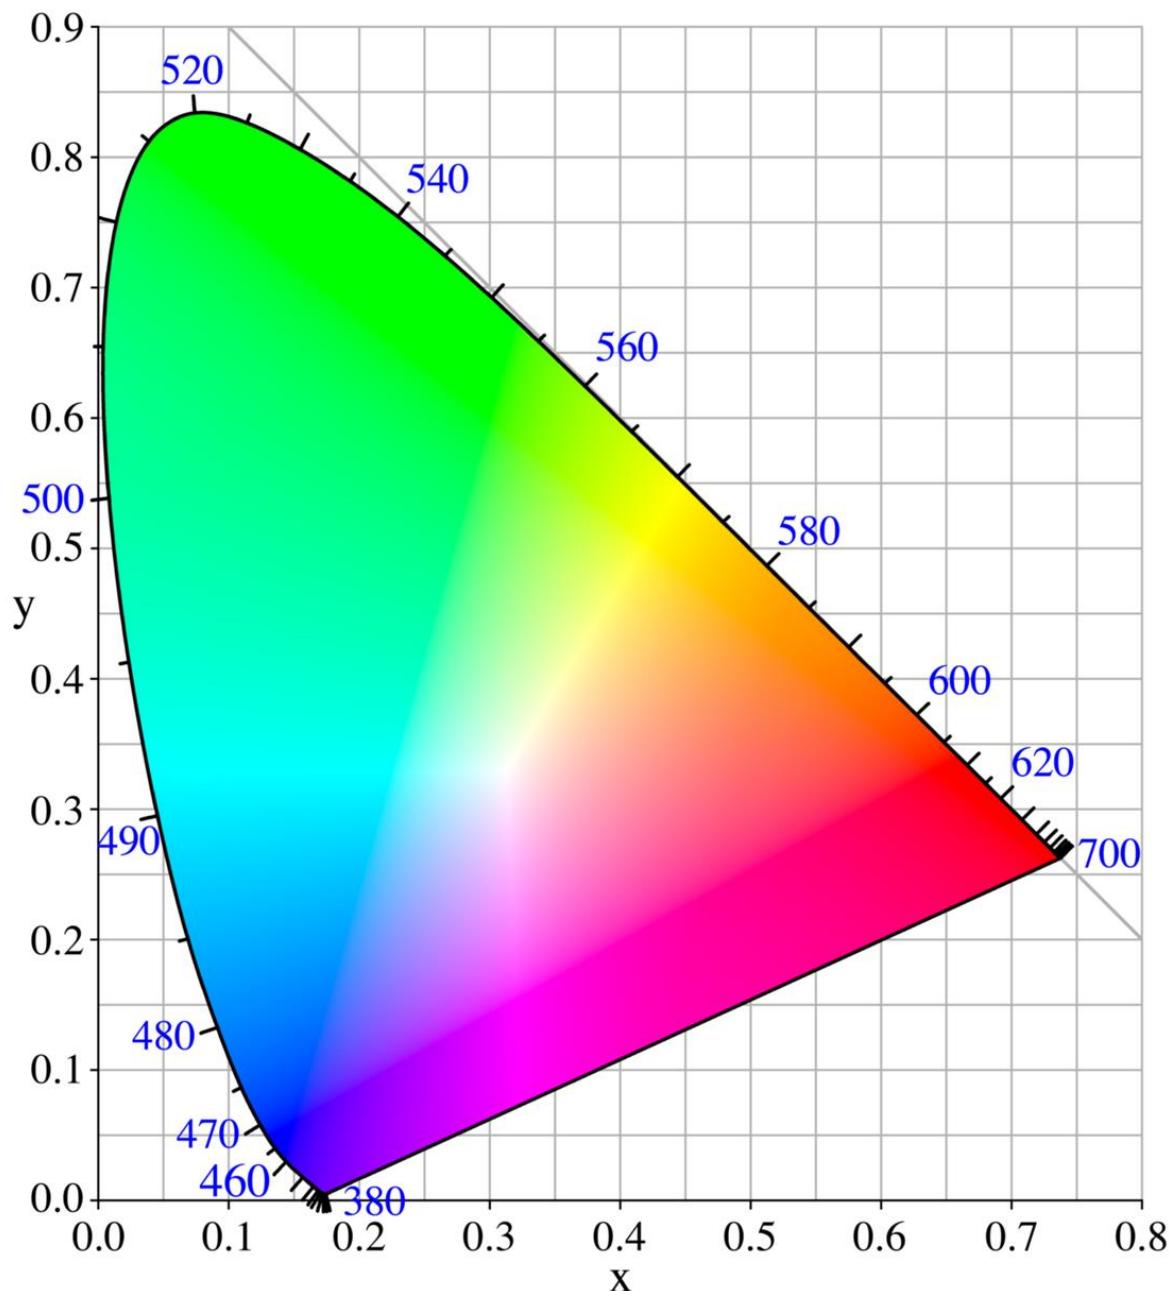

Riverdi Sp. z o. o. will provide new modules marked with "V2" at the end of P/N.

**All intelligent (FT8xx) and SDD1963 modules will be fully compatible concerning the interface connection and electrical parameters.**

RGB module will change slightly. The new IC controller does not have a HVDSL pin.

The table below describes the difference in detail between the modules:

Example comparison between old and new modules		
Parameter	Old value	New value
TFT Driver IC	ILI6480BQ	HX8257A
Power supply		The same
Surface Luminance		The same
Viewing angle		The same
Contrast ratio	400(MIN.), 500(TYP.)	320(MIN.), 400(TYP.)
CIE Color (*see diagram below)	Red (x, y:0.591, 0.310) (TYP.) Green (x, y:0.342, 0.561) (TYP.) Blue (x, y:0.145, 0.087) (TYP.) White (x, y:0.290, 0.340) (TYP.)	Red (x, y:0.620, 0.344) (TYP.) Green (x, y:0.306, 0.563) (TYP.) Blue (x, y:0.133, 0.149) (TYP.) White (x, y:0.30, 0.330) (TYP.)
Mechanical dimensions		
Difference in Pinout	Pin 35 - HVDSL	Pin 35 - NC
I/O interface	Interchangeable. In the new module choice between HV sync and data enable mode is made by DE pin only.	

**The CIE 1931 colour space chromaticity**

**Affected P/Ns and their substitutes:**

Item	EOL P/Ns	Substitute P/Ns	Note
1	RTV4.3A480272TNWC00	RTV4.3A480272TNWC00 V2	Different TFT IC controller
