## UxTouch Assembly Guide

Application Note

Rev.1.1

2019-01-15

## 1 BASIC INFORMATION

UxTouch is the series of LCD TFT displays with specially designed projected capacitive touch panels. UxTouch display can be mounted without any holes in the housing. Our standard UxTouch displays include double-sided adhesive tape (DST) to stick TFT easily to the housing. Basic series includes 2.83", 4.3", 5.0" and 7.0" size.

## 2 MOUNTING PROCESS

UxToch models with double-side adhesive tape (PN endings: 00, 01, 03, 04) can be mounted by connecting the glass to the housing. Riverdi recommends to use support brackets assembled to display's back. An additional support will stiffen the whole structure and minimize the influence of external factors such as vibration. Figures below show examples of using support elements.
